

DEPARTMENT OF HEALTH AND HUMAN SERVICES FOOD AND DRUG ADMINISTRATION MILK HAULER/SAMPLER EVALUATION REPORT	TANKER PERMIT NO.	HAULER PERMIT NO.
	HAULER/SAMPLER	DAILY PICKUP NO.

ADDRESS OF HAULER/SAMPLER	NAME AND ADDRESS OF INSPECTION LOCATION
OWNER	
ADDRESS OF OWNER	NAME AND ADDRESS OF RECEIVING PLANT

An inspection of your milk tank truck and/or an evaluation of your sampling procedures showed violations existing in the items checked below. You are further notified that this inspection sheet serves as notification of the intent to suspend your permit if the violations noted are not in compliance at the time of the next inspection. (See Sections 3 and 5 of the Grade “A” Pasteurized Milk Ordinance.)

MILK TANK TRUCK AND APPURTENANCES

1. Construction complies with PMO regulations
2. Cleaned after each days use
3. Sanitization records/wash tags maintained
4. Vehicle properly identified

HAULER SANITATION PROCEDURES

5. Pickup practices conducted to preclude contamination of milk contact surfaces
6. Hands clean and dry, no infections
7. Clean outer clothing, no use of tobacco
8. Hose port used, tank lids closed during completion of pickup.
9. Hose properly capped between milk pickup operations, hose cap protected during milk pickup
10. Hose disconnected before tank rinsed
11. Observations made for sediment/abnormalities
12. Sample collected at every pickup

BULK TANK SAMPLING PROCEDURES

13. Thermometer – Approved Type
- a. Accuracy – Checked against standard thermometer every 6 months – accuracy (+)(-) division.....
- b. Date checked and checker's initials attached to case
14. Sample Transfer Instrument
- a. Clean, sanitized or sterilized and of proper construction and repair
15. Sampling Instrument Container
- a. Proper design, construction and repair for storing sample dipper in sanitizer
- b. Applicable test kit for checking strength of sanitizer (200 ppm chlorine or equivalent)
16. Sample Containers
- a. Clean, properly sanitized or sterilized
- b. Adequate supply, properly stored or handled
17. Sample Storage Case
- a. Rigid construction, suitable design to maintain samples at 0°C - 4.4°C (32°F - 40°F), protected from contamination
- b. Ample space for refrigerant, racks provided as necessary
18. Sample Collection – Precautions and Procedures
- a. Sampling instrument and container(s) properly carried into and aseptically handled in milkhouse
- b. Bulk tank milk outlet valve sanitized before connecting transfer hose

- c. Smell milk through tank port hole
- d. Observe milk in a quiescent state with lid wide open and lights on when necessary
- e. Test thermometer sanitized (1 min. contact time)
- f. Non-acceptable milk rejected
- g. Dry measuring stick with single-service paper towel
- h. Measure milk only when quiescent
- i. Do not contaminate milk during the measuring process
- j. Agitate milk before sampling at least 5 min. or longer as may be required by tank specs
- k. Do not open bulk tank valve until milk is measured and sampled
- l. Temperature of milk, time, date of pickup and haulers ID recorded on each farm weight ticket
- m. Thermometer accuracy
1. Tank thermometer accuracy checked monthly and recorded when used as test thermometer
2. Accuracy of required recording thermometers checked monthly against standardized thermometer and recorded
- n. Temperature control sample provided at first sampling location for each rack of samples
- o. Temperature control sample properly labeled with time, date, temperature, and with producer and hauler identification
- p. Sample containers legibly identified at collection points
- q. Sample dipper rinsed at least two times in the milk before transferring sample
- r. Dipper should extend 6-8 inches into the milk to obtain representative sample
- s. Do not hold sample container over the milk when transferring sample into the container
- t. Fill sample container no more than ¾ full
- u. Rinse sample dipper in tap water, replace in its container, open milk valve, turn on tank pump
- v. Immediately take milk sample to the sample case
19. Sample Collection – Storage and Transportation
- a. Sample storage – refrigerant maintained no higher than milk level in sample containers – maintain sample temperature – do not bury tops of containers in ice, protect against contamination
- b. Deliver samples to laboratory promptly
- c. Samples and sample data – submitted to laboratory – if by common carrier, use tamper proof shipping case with top labeled “This Side Up”

REMARKS (If additional space is required, please place information on the back of this form or on a separate page.)
